MASTER OPERATING SOFTWARE SYSTEM

Summary

[0001] In one preferred embodiment, the Master Operating Software System 1300 described in attached Exhibit "A" can be stored and/or run on the remote portion 22 described in the attached Exhibit "B", or the multiple computer system 30 described in the attached Exhibit "C", such that remote users can operate such Master Operating Software System 1300. The Master user interface 1310 described in attached Exhibit "A" can include the terminal user system described in the attached Exhibit "D". Thus, the data entry outputs, information outputs, selection outputs and computer terminal contacts described in Exhibit "D" can be used for controlling the Master Operating Software System described in the attached Exhibit "A"
